ABOUT PLANT

Ashirvad Infra Corporation is a growing infrastructure company specializing in the production and supply of premium-quality concrete solutions. With two state-of-the-art units, the company is committed to delivering reliable and durable concrete for diverse construction needs. Through a focus on quality, innovation, and customer satisfaction, Ashirvad Infra Corporation has built a strong presence as a trusted partner in the construction industry.

VISION

Ashirvad Infra Corporation aims to build strong foundations with quality concrete and trusted service.

MISSION

Our mission is to deliver high-quality ready-mix concrete solutions that empower construction excellence, while promoting sustainability, innovation, and customer trust.

SERVICES

1

ROAD CONCRETE

Durable concrete for roads enduring heavy traffic and weather.

2

BUILDING CONCRETE

High-quality concrete for strong, durable building foundations.

3

BRIDGE CONCRETE

Reliable concrete mixes for stable, long-lasting bridges.

4

INDUSTRIAL CONCRETE

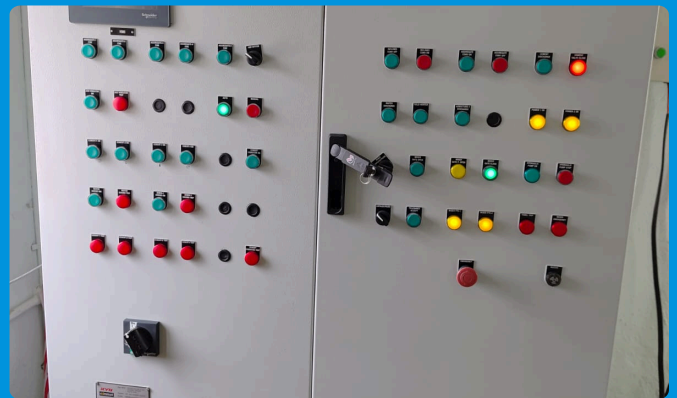

Custom concrete mixes for factories, warehouses, and infrastructure.

QUALITY CONTROL LAB

LABORATORY

Ashirvad Infra Corporation has a fully equipped laboratory for testing concrete and raw materials. Our mixes are carefully designed to meet BIS standards with assured quality. We also focus on sustainable research using steel slag and recycled aggregates, delivering reliable concrete solutions

OUR POLICY

Safety is our top priority, both within the plant and during transport. We strictly follow government regulations for the ready-mix industry and promote eco-friendly concrete. Every ready-mix batch is tested through cube samples before delivery to ensure quality. Our facility can produce 1,500 cubic meters per day with a raw material storage capacity of 3,000 cubic meters.

OUR PLANTS & MACHINERY

MACHINERY

DESCRIPTION	QTY
Rated Capacity of Plants	1200 M3/day (60 M3/hr)
CONCRETE TRANSMIXERS	30
BOOM PUMP	1
LINE PUMP	7
TIPPER	5

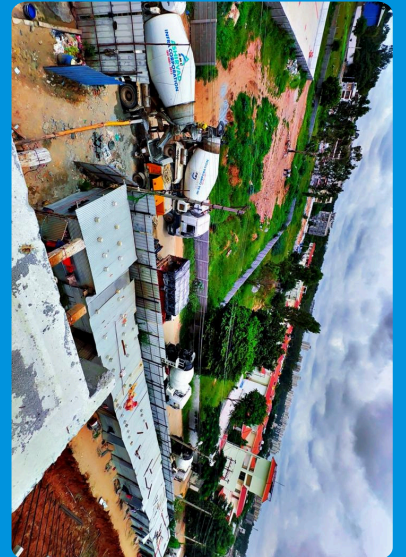

PLANT PRODUCTION

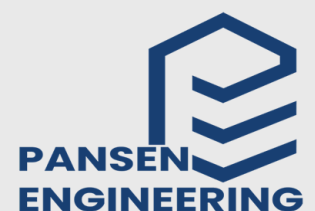

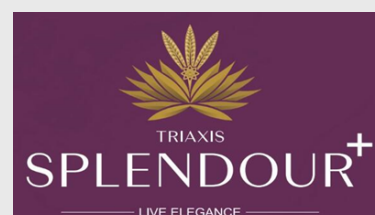

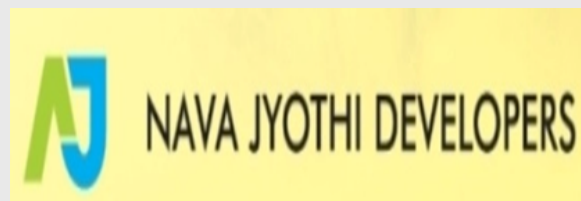

Our RMC plant is equipped with a high-capacity batching system capable of producing 60 cubic meters of concrete per hour. With this 1 m³ plant, we ensure efficient and consistent production, achieving a daily output of up to 1200 cubic meters, guaranteeing timely and reliable supply for all your construction needs.
